

The rapid decline of oil prices, the growth of alternative energy sources and the reduction in capital spending have created serious challenges for the manufacturers in today's energy industry. In addition, the global economy is forecast to grow significantly in the years ahead and will require even more energy usage. Epicor has the software solutions you need to address market pressures and develop new strategies for success in a changing environment.

- Manage complex projects that can require intricate multilevel phases, as well as strict costing and complex billing
- Manage complex projects that can require intricate multilevel phases, as well as strict costing and complex billing
- Perform detailed estimation, planning, scheduling, costing and supply chain logistics for complete control and analysis of any project
- Optimize project management, mobile field service management, maintenance management, financial management, asset management and customer relationship management (CRM)
- Agile production management that supports a variety of production methods ranging from discrete to mixed-mode, engineer-to-order, make-to-order, make-to-stock, and configure-to-order
- Integrated engineering, procurement, production, and services
- Comprehensive field service functionality and full data synchronization in a workflow-based mobile application
